

Daniel A. Long, Ph.D.

Middletown, CT | drdaniellong@gmail.com

PROFESSIONAL SUMMARY

Quantitative research professional with 30 years of experience analyzing large-scale administrative, longitudinal, and survey data to support institutional planning, policy, and program evaluation. Extensive experience querying, cleaning, and reconciling complex datasets from student- and administrative-level systems; building reports, dashboards, and visualizations for federal, state, and institutional reporting; and communicating data-driven findings clearly to faculty, administrators, policymakers, and the public. Proven track record managing multiple concurrent, deadline-driven research projects while maintaining rigorous standards for data accuracy, integrity, and confidentiality.

TECHNICAL & ANALYTICAL SKILLS

Programming & Statistical Software: SQL, SPSS, SAS, R, Stata, HLM, Python

Data Visualization & Reporting: R-Shiny, Tableau, GIS, Microsoft Excel (advanced), Power BI and Evisions Argos (working knowledge); knowledge of IPEDS reporting requirements

Quantitative Methods: Multilevel/hierarchical linear modeling, growth curve modeling, propensity score matching, difference-in-differences, fixed-effects models, structural equation modeling, factor analysis, event history analysis, quasi-experimental and experimental design

Data Management & Governance: Querying, cleaning, and reconciling census and live administrative/student-information-system data; building data dictionaries and validation routines; upholding data governance and confidentiality standards; producing longitudinal, reproducible datasets; experience building simulated Banner-based reporting pipelines using Oracle SQL/PL and sqlcl to generate IPEDS-uploadable files via the R package IPEDSuploadables

Survey & Project Management: Designing and fielding national and local surveys; managing multiple concurrent research projects and staff; grant proposal development; training and cross-training research staff

Communication: Translating complex statistical findings for non-technical audiences; experience with legislative testimony, media interviews, and presentations to school districts and state agencies

PROFESSIONAL EXPERIENCE

Senior Research Scientist, Learning Sciences — NWEA/HMH, Boston, MA 2024–2026

- Conduct program-effectiveness research on advanced mathematics access, early reading programs, multilingual learner instruction, and gifted and talented programs for state departments of education and school districts.
- Helped create dashboards of national and state achievement trends in U.S. public, charter, and religious schools.

Research Scientist (2018–2024) / Postdoctoral Fellow (2017–2018) — Neag School of Education, University of Connecticut 2017–2024

- Analyzed gifted-education policy and underrepresentation of low-income students, racial/ethnic minorities, and English learners using propensity score matching, multilevel modeling, growth curve modeling, quasi-experimental methods, and machine learning.
- Worked within a federally funded national research center, managing large administrative and survey datasets across multiple state and district partners and co-authoring findings for peer-reviewed journals and policy audiences.

Director of Research and Senior Education Policy Fellow — Connecticut Voices for Children, New Haven, CT 2016–2017

- Directed research on education policy, college and career readiness, and early care and education using state administrative and Current Population Survey data.

- Built interactive dashboards and maps in Tableau to communicate data findings to policymakers and the public; supervised research staff and analyzed state budget data to support legislative advocacy.
- Presented research findings at the Connecticut State Legislature and in local media, including NPR coverage.

Director of Quantitative Research — *Research for Action, Philadelphia, PA* 2015–2016

- Led quantitative research and survey design for 20 concurrent projects and served as principal investigator or co-author on 10 published reports and briefs.
- Directed local, regional, and national surveys; applied multilevel modeling, event history analysis, and GIS to program evaluation and policy studies, including statewide school-district budget surveys and a statewide teacher/administrator evaluation-system study.
- Led acquisition of over \$600,000 in direct research funding and provided methodological advice supporting an additional \$1,000,000 in funding from national foundations, state departments of education, and school districts.
- Trained and supervised research staff and helped develop research proposals for prospective funders.

Assistant Professor, Department of Sociology — *Wesleyan University, Middletown, CT* 2006–2014

- Co-founded the Wesleyan Quantitative Analysis Center and the Wesleyan National Survey Center.
- Taught research methods, statistics, sociology of education, educational policy, and sociology of race and ethnicity for eight years.

Evaluation, Methodological, and Statistical Consultant — *Select projects for Connecticut Education Association, Wisconsin Center for Educational Research, Vanderbilt University, and NYU researchers* 2003–Present

- Provided quasi-experimental design, growth curve modeling, and event history analysis for externally funded evaluation and research projects, including studies of teacher accountability, early childhood education, and college retention.

Lecturer, Teaching Assistant, and Project Assistant, Department of Sociology — *University of Wisconsin–Madison* 1996–2006

- Taught statistics and race/ethnicity courses; conducted quantitative research on education and demographic topics using event history analysis and other methods for university research centers.

6th-Grade Bilingual Math and Science Teacher — *Drew Middle School, South-Central Los Angeles, CA* 1994–1996

EDUCATION

Ph.D., Sociology (graduate training in Demography and Economics), University of Wisconsin–Madison, 2006

M.S., Sociology, University of Wisconsin–Madison, 2001

B.A., Economics, Swarthmore College, 1994
